

# MobiTech® Clinic Anywhere

The fully equipped mobile clinic for specialists and general practitioners, based on typical aluminum lightweight construction and high-strength polyurethane foams, provides the highest level of room quality and versatility. Naturally air conditioned, supplied with water and with sewage discharge, the mobile clinic is equipped with the latest medical technology. The durable, insensitive and lasting interior equipment is easy to keep hygienic clean.

The mobile clinic can be used everywhere and is multifunctional. Places of use can be accessed via ground, air and water. Dimensions of the *MobiTech®* match the globally common 20' ISO Standard. Tested in difficult terrain as well as under extreme climatic conditions and tried by local public health offices and emergency doctors, the mobile clinic proves time and again its strength.

*MobiTech®* Mobile Clinic can be used at places with inadequate provision of medical care where, due to their geographical location or social situation, people need help. The medical equipment according to customer request
